The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 13, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pitschi et al in view of Cote et al 6447616.

Pitschi et al substantially discloses the claimed invention, including a coaxial electrical connector having at least the metal supporting element 15 made of bronze. Pitschi et al, however, does not disclose the bronze as being made of copper-tin-zinc-lead, with the proportion of zinc being less than 7% by weight. Cote et al (column 1, lines 8-12), however, discloses such an alloy, and to make the bronze element 15 of Pitschi et al of this alloy thus would have been obvious, for good strength and conductivity. To make element 15 out of cast bronze would have been obvious, since casting is commonly used to make metal parts.

Applicant's arguments filed February 12, 2007 have been fully considered but they are not persuasive. It would have been an obvious matter of routine experimentation to set the proportion of zinc at less than 7% by weight, since bronze by definition is primarily made of copper and tin. Note that Crampton et al (2,309,100) discloses a copper-based alloy with a zinc content of 7% by weight.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
